Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a method of optically detecting labeled molecules, classified in class 435, subclass 6.
 - II. Claim 17, drawn to a system comprising a surface, an illumination zone, a light source, two flowing solutions, switching means and a circuit, classified in class 422, subclass 68.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product. For example, the system can be used to photosynthesize molecules on the support and the system can be used to isolate and/or purify molecule-specific binding agents.
3. Because these inventions are distinct for the reasons given above, because the invention have acquired a separate status in the art because of their recognized divergent subject matter, and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. For example, the search required for Group I encompasses a search of chemical reactions, reagent solutions, detectable labels and label detection. In contrast, the search required for Group II encompasses a search of optical systems comprising flow cells, light sources, optical detectors and circuitry.

Art Unit: 1634

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
